

Beryn Staub-Waldenberg

My program does compile correctly. It runs correctly as well.

There are no major parts of my program that aren't working to my knowledge. As far as efficiency, I wonder if there would have been a way to keep track of the moving average using just the main deque that holds all of the adjusted days, although I wasn't able to come up with one that completely worked. I think I spent about 20 hours on this assignment.

expected score:

correct output: 30/30

obeys constraints: 4/4

good design and style: 2/2

write up complete: 2/2

output format correct: 1/1

filename format correct: 1/1
